#### Condensed Consolidated Financial Statements

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the instructions to Form 10-Q. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States for complete financial statements. In the opinion of management, all normal recurring adjustments considered necessary for a fair statement of the results of operations have been included. The results of operations for the nine months ended September 30, 2010 are not necessarily indicative of the results of operations for the full year. When reading the financial information contained in this Quarterly Report, reference should be made to the financial statements, schedule and notes contained in the Company's Annual Report on Form 10-K for the year ended December 31, 2009

#### Liquidity

The financial statements have been prepared using accounting principles generally accepted in the United States of America applicable for a going concern, which assumes that the Company will realize its assets and discharge its liabilities in the ordinary course of business. For the nine months ended September 30, 2010, the Company has generated revenues of \$1,643,597, but has incurred a net loss of \$739,397. Its ability to continue as a going concern is dependent upon achieving sales growth, reduction of operation expenses and ability of the Company to obtain the necessary financing to meet its obligations and pay its liabilities arising from normal business operations when they come due, and upon profitable operations. The Company has been funded by the CEO and majority shareholder, Charles M. Piluso since inception. The Company has been successful in raising money as needed. Further it is the intention of Mr. Piluso to continue to raise money through stock issuance and to fund the Company on an as needed basis.

#### Stock Based Compensation

The Company follows the requirements of FASB ASC 718-10-10, Share Based Payments with regard to stock-based compensation issued to employees. The Company has various employment agreements and consulting arrangements that call for stock to be awarded to the employees and consultants at various times as compensation and periodic bonuses. The expense for this stock based compensation is equal to the fair value of the stock price on the day the stock was awarded multiplied by the number of shares awarded.

#### Recently Issued Accounting Pronouncements

In October 2009, the FASB issued ASU 2009-13, *Multiple-Deliverable Revenue Arrangements*, (amendments to FASB ASC Topic 605, *Revenue Recognition*) ("ASU 2009-13"). ASU 2009-13 requires entities to allocate revenue in an arrangement using estimated selling prices of the delivered goods and services based on a selling price hierarchy. The amendments eliminate the residual method of revenue allocation and require revenue to be allocated using the relative selling price method. ASU 2009-13 should be applied on a prospective basis for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010, with early adoption permitted. The Company does not expect adoption of ASU 2009-13 to have a material impact on the Company's results of operations or financial condition.

In April 2010, the FASB issue ASU 2010-17, Revenue Recognition – Milestone Method ("ASU 2010-17"). ASU 2010-17 provides guidance on the criteria that should be met for determining whether the milestone method of revenue recognition is appropriate. A vendor can recognize consideration that is contingent upon achievement of a milestone in its entirety as revenue in the period in which the milestone is achieved only if the milestone meets all criteria to be considered substantive. The following criteria must be met for a milestone to be considered substantive. The consideration earned by achieving the milestone should 1. Be commensurate with either the level of effort required to achieve the milestone or the enhancement of the value of the item delivered as a result of a specific outcome resulting from the vendor's performance to achieve the milestone. 2. Related solve to past performance. 3. Be reasonable relative to all deliverables and payment terms in the arrangement. No bifurcation of an individual milestone is allowed and there can be more than one milestone in an arrangement. Accordingly, an arrangement may contain both substantive and nonsubstantive milestones. ASU 2010-17 is effective on a prospective basis for milestones achieved in fiscal years, and interim periods within those years, beginning on or after June 15, 2010. The Company does not expect adoption of ASU 2010-17 to have a material impact on the Company's results of operations or financial condition.

Management does not believe there would have been a material effect on the accompanying financial statements had any other recently issued, but not yet effective, accounting standards been adopted in the current period.

#### Note 2 - Summary of Significant Accounting Policies

#### Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from these estimates.

#### Estimated Fair Value of Financial Instruments

The Company's financial instruments include cash, accounts receivable, accounts payable, line of credit and due to related parties. Management believes the estimated fair value these accounts at September 30, 2010 approximate their carrying value as reflected in the balance sheets due to the short-term nature of these instruments or the use of market interest rates for debt instruments. The carrying values of certain of the Company's notes payable and capital lease obligations approximate their fair values based upon a comparison of the interest rate and terms of such debt given the level of risk to the rates and terms of similar debt currently available to the Company in the marketplace. It is not practical to estimate the fair value of certain notes payable, the convertible debt and the liability for contingent compensation from acquisition. In order to do so, it would be necessary to obtain an independent valuation of these unique instruments. The cost of that valuation would not be justified in llight of the circumstances.

#### Goodwill and Other Intangibles

Goodwill is not subject to amortization and is tested for impairment annually and whenever events or changes in circumstances indicate that impairment may have occurred. Intangible assets were evaluated to determine if they are finite or indefinite-lived. The intangible assets that are finite lived are amortized over the useful life of the asset. Indefinite-lived intangible assets are also tested for impairment annually and whenever events or changes in circumstances indicate that their carrying value may not be recoverable.

#### Revenue Recognition

The Company's revenues consist principally of storage revenues. Storage revenues consist of monthly charges related to the storage of materials or data (generally on a per unit basis). Sales are generally recorded in the month the service is provided. For customers who are billed on an annual basis, deferred revenue is recorded and amortized over the life of the contract. Set up fees charged in connection with storage contracts are deferred and recognized on a straight line basis over the life of the contract.

#### Net Income (Loss) per Common Share

In accordance with FASB ASC 260-10-5 Earnings Per Share, basic income (loss) per share is computed by dividing net income (loss) by the weighted average number of shares of common stock outstanding during the period. Diluted earnings per share is computed by dividing net income (loss) adjusted for income or loss that would result from the assumed conversion of potential common shares from contracts that may be settled in stock or cash by the weighted average number of shares of common stock, common stock equivalents and potentially dilutive securities outstanding during each period. The inclusion of the potential common shares to be issued have an anti-dilutive effect on diluted loss per share and therefore they are not included in the calculation. Potentially dilutive securities at September 30, 2010 include 2,924,434 options and 3,014,438 warrants.

#### Concentrations

For the nine months ended September 30, 2010 the company had one customer that represented approximately 16% of sales and for the nine months ended September 30, 2009, had two customers that represented approximately 29% of sales.

Share-based compensation expense for options totaling \$10,446 was recognized in our results for the nine months ended September 30, 2010 is based on awards vested. The options were valued at the grant date at \$116,058.

The valuation methodology used to determine the fair value of the warrants issued during the year was the Black-Scholes option-pricing model, an acceptable model in accordance with FASB ASC 718-10-10 Share Based Payments. The Black-Scholes model requires the use of a number of assumptions including volatility of the stock price, the average risk-free interest rate, and the weighted average expected life of the warrants.

The risk-free interest rate assumption is based upon observed interest rates on zero coupon U.S. Treasury bonds whose maturity period is appropriate for the term of the Warrants and is calculated by using the average daily historical stock prices through the day preceding the grant date

Estimated volatility is a measure of the amount by which the Company's stock price is expected to fluctuate each year during the expected life of the award. The Company's estimated volatility is an average of the historical volatility of peer entities whose stock prices were publicly available. The Company's calculation of estimated volatility is based on historical stock prices of these peer entities over a period equal to the expected life of the awards. The Company uses the historical volatility of peer entities due to the lack of sufficient historical data of its stock price.

The weighted average fair value of options granted and the assumptions used in the Black-Scholes model during the nine months ended September 30, 2010 and 2009 are set forth in the table below.

	2	010	2009
Weighted average fair value of options granted	\$	0.35	\$ 0.29
Risk-free interest rate		3.32%	3.07%
Volatilty		85%	85%
Expected life (years)		10	10
Dividend yield		0.00%	0.00%

As of September 30, 2010, there was approximately \$46,000 of total unrecognized compensation expense related to unvested employee options granted under the Company's share based compensation plans that is expected to be recognized over a weighted average period of approximately 4.0 years.

#### Note 9 - Convertible debt

On May 21, the Company entered into three security purchase agreements including \$1,000,000 of convertible notes payable along with 3,014,437 warrants to purchase common stock of the company at \$.01. Each note is convertible into common stock at an exercise price of \$.39.

At their commitment date, each convertible promissory note was tested for a beneficial conversion feature by comparing the effective conversion price to the fair value of the Company's stock. The Company recognized a beneficial conversion feature of \$410,256 which was recorded as a discount to the convertible promissory notes with an offset to additional paid-in capital. Additionally, the relative fair value of the warrants of \$509,800 was calculated and recorded as a further reduction to the carrying amount of the convertible debt and as an addition to paid-in capital. The Company is amortizing the debt discount over the term of the debt. Amortization of debt discount for the nine months ended September 30, 2010 was \$89,450.

#### Note 10 - Acquisition

On June 17, 2010, our wholly owned subsidiary Data Storage Corporation, a Delaware corporation ("Data Storage DE") and SafeData, LLC, a Delaware Limited Liability Company ("SafeData") entered into an Asset Purchase Agreement (the "Agreement"); setting forth the acquisition of Safe Data's assets. #### **Liquidity and Capital Resources**

In 2010 we intend to continue to work to increase our presence in the marketplace through both organic growth and acquisition of data storage service provider's assets.

To the extent we are successful in growing our business, identifying potential acquisition targets and negotiating the terms of such acquisition, and the purchase price includes a cash component, we plan to use our working capital and the proceeds of any financing to finance such acquisition costs. Our opinion concerning our liquidity is based on current information. If this information proves to be inaccurate, or if circumstances change, we may not be able to meet our liquidity needs.

During the nine months ended September 30, 20010 the company's cash increased \$1,210 to \$29,370 from \$28,160 at December 31, 2009. Net cash of \$128,458was used in the Company's operating activities and cash of \$1,267,191 was used in investing activities, primarily for the acquisition of the net assets of SafeData, LLC. Cash of \$1,396,860 was provided by the company's financing activities, the majority of the financing was from the issuance of convertible debt and stock.

We do not have any off-balance sheet arrangements, financings, or other relationships with unconsolidated entities or other persons, also known as "special purpose entities" (SPEs).

#### Item 3. Quantitative and Qualitative Disclosures About Market Risk

The Company is subject to certain market risks, including changes in interest rates and currency exchange rates. The Company does not undertake any specific actions to limit those exposures.

### Item 4. Controls and Procedures

- a) Evaluation of Disclosure Controls. Pursuant to Rule 13a-15(b) under the Securities Exchange Act of 1934 ("Exchange Act"), the Company carried out an evaluation, with the participation of the Company's management, including the Company's Chief Executive Officer ("CEO") and Chief Financial Officer ("CFO") (the Company's principal financial and accounting officer), of the effectiveness of the Company's disclosure controls and procedures (as defined under Rule 13a-15(e) under the Exchange Act) as of the end of the period covered by this report. The Company lacks the size and complexity to segregated duties sufficiently for proper controls. Based upon that evaluation, the Company's CEO and CFO concluded that the Company sidesclosure controls and procedures are not effective to ensure that information required to be disclosed by the Company in the reports that the Company files or submits under the Exchange Act, is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to the Company's management, including the Company's CEO and CFO, as appropriate, to allow timely decisions regarding required disclosure.
- (b) Changes in internal control over financial reporting. There have been no changes in our internal control over financial reporting that occurred during the last fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

#### **PART II - OTHER INFORMATION**

#### Item 1. Legal Proceedings

We are currently not involved in any litigation that we believe could have a material adverse effect on our financial condition or results of operations. There is no action, suit, proceeding, inquiry or investigation before or by any court, public board, government agency, self-regulatory organization or body pending or, to the knowledge of the executive officers of our company or any of our subsidiaries, threatened against or affecting our company, our common stock, any of our subsidiaries or of our companies or our subsidiaries' officers or directors in their capacities as such, in which an adverse decision could have a material adverse effect.

#### Item 1A. Risk Factors

None

#### Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

On August 12, 2009 the Company entered into a stock purchase agreement for 288,572.25 shares of common stock for \$100,000.

On May 21, 2010 the company entered into three security purchase agreements totaling \$1,300,000. The agreements were with the chairman of the company for \$700,000 and two unrelated individuals for \$500,000 and \$100,000. The security purchase agreements consisted of the issuance of common stock, convertible debentures and warrants as follows:

Common Stock	600,000 shares @ \$0.50	
Convertible Debentures	\$1,000,000	
Warrants	3,014,437 shares @ \$0.01	

These shares were issued in reliance on the exemption under Section 4(2) of the Securities Act of 1933, as amended (the "Act"). These shares of our common stock qualified for exemption under Section 4(2) of the Securities Act of 1933 since the issuance shares by us did not involve a public offering. The offering was not a "public offering" as defined in Section 4(2) due to the insubstantial number of persons involved in the deal, size of the offering, manner of the offering and number of shares offered. We did not undertake an offering in which we sold a high number of shares to a high number of investors. In addition, the investors had the necessary investment intent as required by Section 4(2) since they agreed to and received share certificates bearing a legend stating that such shares are restricted pursuant to Rule 144 of the 1933 Securities Act. This restriction ensures that these shares would not be immediately redistributed into the market and therefore not be part of a "public offering." Based on an analysis of the above factors, we have met the requirements to qualify for exemption under Section 4(2) of the Securities Act of 1933 for this transaction.
